	Office Action Summary	Examin r	Art Unit				
		Robert Landsman	1647				
	The MAILING DATE of this communication appears on the cov r sheet with the correspondenc address Period for Reply						
	A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status						
	1) Responsive to communication(s) filed on						
	2a)☐ This action is FINAL . 2b)⊠ This action is non-final.						
	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
	closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims						
	4)⊠ Claim(s) <u>1-35</u> is/are pending in the application.						
	4a) Of the above claim(s) is/are withdrawn from consideration.						
i	5) Claim(s) is/are allowed.						
	6) Claim(s) is/are rejected.						
	7) Claim(s) is/are objected to.						
	8) Claim(s) <u>1-35</u> are subject to restriction and/or election requirement.						
1	Application Papers						
	9) The specification is objected to by the Examiner.						
	10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.						
	Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
	11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.						
	If approved, corrected drawings are required in reply to this Office action.						
12) The oath or declaration is objected to by the Examiner.							
"	Priority under 35 U.S.C. §§ 119 and 120						
	13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
	a) All b) Some * c) None of:						
	1. Certified copies of the priority documents have been received.						
	2. Certified copies of the priority documents have been received in Application No						
	3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.						
	14)⊠ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).						
	a) The translation of the foreign language provisional application has been received. 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Art Unit: 1647

DETAILED ACTION

1. Election/Restriction

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a method of modulating cell migration by contacting a cell with galectin-3, classified in class 435, subclass 7.2.
 - II. Claims 8-13, drawn to a method of modulating cell migration by contacting a site with galectin-3, classified in class 435, subclass 7.1.
 - III. Claims 14-17 and 18 in part, drawn to a method of identifying an agent that modulates galectin-3 in vitro or intracellularly, classified in class 435, subclass 7.1.
 - IV. Claims 14-17 and 18 in part, drawn to a method of identifying an agent that modulates galectin-3 in vivo, classified in class 435, subclass 7.1.
 - V. Claims 19-22 and 27 in part, drawn to a composition comprising an agent that modulates galectin-3 cell migration, class and subclass undeterminable.
 - VI. Claims 23, 24 and 27 in part, drawn to a composition comprising a migration-modulating amount of a galectin-3 antibody, classified in class 424, subclass 130.1.
 - VII. Claims 25, 26, 27 in part, and 28-30, drawn to a composition comprising a migration-modulating amount of galectin-3, classified in class 514, subclass 2.
 - VIII. Claims 31-35, drawn to a microfabricated device containing galectin 3, class 514, subclass 963.
- B. The inventions are distinct, each from each other because of the following reasons:

Inventions I - IV are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps and goals.

Inventions V -VIII are independent and distinct, each from each other, because they are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged.

Inventions I, II are unrelated to V, VI, VIII. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together.

Application/Control Number: 09/805,449

Art Unit: 1647

Inventions III, IV are unrelated to V-VIII. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together.

Inventions VII and I, II are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product, or (2) the product as claimed can be used in a materially different process of using that product MPEP § 806.05(h). The composition of Invention VII can be used in vivo for treating a subject, as well as in vitro for cell migration.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Furthermore, if Applicants elect Inventions V, VI, or VII, then Applicants are required to further elect one drug in claim 27. These drugs are independent and distinct, each from each other, because they are products which possess characteristic differences in structure and function and each has an independent utility that is distinct for each invention which cannot be exchanged. Therefore, compositions comprising these drugs would also be independent and distinct.

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).

Art Unit: 1647

Advisory information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Landsman whose telephone number is (703) 306-3407. The examiner can normally be reached on Monday - Friday from 8:00 AM to 5:00 PM (Eastern time) and alternate Fridays from 8:00 AM to 5:00 PM (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Gary Kunz, can be reached on (703) 308-4623.

Official papers filed by fax should be directed to (703) 308-4242. Fax draft or informal communications with the examiner should be directed to (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Robert Landsman, Ph.D. Patent Examiner Group 1600 July 22, 2002
